

SUCCESS STORY

RCI Quality 2IT Website

Overview

In May 2010, RCI, in collaboration with the European Software Institute (ESI) Center for Eastern Europe, launched the website www.quality2it.org - a platform for regional capacity in IT Training and Certification. The main objective of this website is to support the establishment of an Excellence Network for Eastern Europe and promote cooperation and partnership between IT training and certification service providers.

The website features:

- A catalogue of Excellence Centers and Service providers of IT training and certification services;
- The quality services that can be found within the network are in areas of: Strategic Management, Operational Management, Project Management, Software Development PI, ICT Services PI, Information Security, Vendor Specific and University programs;
- **31 quality service organizations** as members of the network, which are registering more than **60 training and/or certification services**;
- Organizations from **15 countries**: Albania, Armenia, Azerbaijan, Bosnia and Herzegovina, Bulgaria, Georgia, Croatia, Kosovo, Moldova, Macedonia, Romania, Serbia, Slovenia, Turkey and Ukraine;
- **A news section** where registered organizations can share information about their events/ trainings, success stories, introduction of new services, project implementation, etc.

The site has a user-friendly interface both for the companies that presents their products and services and for potential clients interested in purchasing them.

The RCI project is implemented by SEGURA/IP3 Partners.
